

What is ?

This internationally recognized marking is proudly placed on all Durasol SunShelter® retractable awnings produced in our Middletown, New York facility. This seal indicates that the shading system you purchase has been exposed to rigorous independent testing and complies with all electrical and endurance safety standards in the United States and Canada. It also means our production facility is cTÜVus certified. This marking indicates that we are held to a higher standard than the industry benchmark, producing safer and more reliable products.

Why certified?

CE certified products can be found around your home and office. Most of the quality products you already own have the CE mark. This mark certifies a higher level of quality and performance. With the purchase of an awning, you are considering a several hundred pound product installed on your home that you and your family will sit under – we're confident that our added level of quality and safety along with the TÜV certification will provide the peace of mind that tens of thousands of past Durasol customers have come to appreciate. Durasol also provides almost a quarter century of manufacturing history and a 99.6% customer satisfaction rate.

What other awning companies have been certified?

To date, no other company in the US has made the investment to assure their customers the quality and safety level only Durasol provides. Because all of our products are custom designed and manufactured, our factory and materials are all monitored through rigorous independent testing and evaluations. We are the only company in North America whose facility, production methods and final assembly complies with TÜV and CE standards. Other awning brands may claim that they are “TÜV certified” but often this is not the case. If they make the claim, ask for a copy of their TÜV certificate. You can also check their claim at www.tuvdotcom.com and check out other awning manufacturer's claims by searching for the keyword “awning”. If you can't find them here, then they are not certified. Durasol's certificate number is 72063314.

Look for the label of assured quality

This label is located on every Durasol SunShelter we produce. Durasol remains the industry leader in providing homeowners world class proven products that safely add style and function to any home.

Why Choose Durasol?

Durasol is America's leading manufacturer of custom-built, professionally-installed shading systems. Almost a quarter of a century of experience coupled with technologically-advanced manufacturing assures Durasol customers that they will receive the highest quality products and superb value. Durasol backs the claim of superior performance and quality with the best warranty coverage available and top-notch service through the most professional dealer network in the industry.
